## Short description:

An improved version of the original conduit. It's smaller and therefore takes less time and material to print. It's also more efficient and can send more water to the top of the 3Dponics system. Want to know how much it would cost to print this part? Visit <https://www.3Dprintler.com>

## Description:

<p>If you have a dual outlet pump (e.g. HagenMarina 200), you can power two or more 3Dponics systems with one air pump.<br></p><p>Visit our website (<a rel="nofollow" target="\_blank" href="https://www.3dponics.com/">https://www.3dponics.com</a>) and join our Google+ community (<a rel="nofollow" target="\_blank" href="https://plus.google.com/u/0/communities/111638904033818784260">https://plus.google.com/u/0/communities/111638904033818784260</a>)</p>

If you can, please use the online documentation found at <http://www.youmagine.com/designs/venturi-3dponics-drip-hydroponics> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
